Honda cm400c

The Honda CM is a street bike produced by the Honda Motor Company from to , part of a series of motorcycles with the prefix 'CM' using various engine capacities. It was a precursor to the Honda Rebel series of motorcycles. It was equipped with electric start and electronic ignition. The CMC was produced only in making it one of the more rare model types. The Honda CM series all generally resembled the older-style flat-seat bikes from the s and s, with the exception of a slightly raised passenger area seat and small plastic fairings for the battery and electrical. These are "standard" style motorcycles but do have some elements of the cruiser stepped seat, increased fork angle, extra chrome. The CM series includes only a speedometer and three indicator lights neutral, oil pressure, high beam with a tachometer for the C and T models. While not particularly powerful, the CM's handling makes it a suitable starter bike. Many engine components are common with the Honda CBT models from the same year. The parallel twin engine has three valves per cylinder two intake, one exhaust and a five-speed manual or two-speed automatic transmission. In the film Purple Rain , Prince , in the role of The Kid, rode a customized Honda CM and he is also seen with it on the cover to the soundtrack of the same name. Styled to resemble cafe racers of the s, the Honda CM motorcycle series was geared toward beginning riders with a small cc engine and simple design. In production for only three years, it was small, light, classically styled and had manageable power. Honda released their first CM series motorcycle in and made it available in automatic or manual. The CMT came in just two color schemes: candy presto red and candy holly green. Both had orange and red pinstripes. Designed for new riders, the top speed was limited to mph. The CM series inspired the Honda Nighthawk, which debuted in From to , the CM series used the same power plant. A cc, single overhead cam, three-valve, parallel twin paired to a five-speed gearbox produced 43 horsepower at 8, rpm. The air-cooled, wet sump four-stroke had a compression of 9. According to motorprofi. By no means were these motorcycles fast, which made them suitable as starter bikes. The original CMA was an automatic. The automatic version had the same mechanical specifications as the others but the top speed was limited to 80 mph. The CME came without a tachometer. The "E" stood for economy. The CMT was the most powerful. The "T" stood for touring. With a top speed of mph, it had additional features, which included a tachometer. The CMC came with the most features including upgraded brakes, black Cornstar wheels and dual carburetors. The "C" stood for custom and was only available in The CMC had dual piston front calipers for better stopping ability. The front tire had a size of 3. Depending on the year and model, the CM came stock with black five-star rims or chrome wire-spoke rims. In , the CM was considered a touring motorcycle, which led to the 2. The cc engine was fuel-efficient. Dual exhaust added to aesthetics and increased the flow of engine waste. The flat seat, plastic fairings, single headlight and mechanical components added up to a curb weight of pounds. We carry the full line of powersports products from all the major manufactures. Financing is available and we accept all applications! All new units are in showroom condition and come with a full factory warranty. Our sale prices are not honored to walk-in customers at any of our Xtreme dealerships. Call or text Adam at today for a hassle free shopping experience! An added plus: The CBF is a little bit lighter, and you sit up a little straighter. And the fuel-injected engine also offers excellent fuel economy. But maybe the best news of all is the price. Model NCX. On the weekend it lets you go exploring in the country, or carve up a twisty canyon road. Model PCX The Honda PCX is one of the most versatile, practical and sensible scooters on the planet, and a blast to ride!. The PCX has a new look for , offers great fuel efficiency with plenty of room to carry a passenger. A bigger fuel tank this year adds even more range, while dual headlights and sharp new bodywork change up the look. Integrated storage for those trips to the market? Of course. Automatic transmission? Model Shadow Aero. Classic, retro style, like the spoked wheels, full fenders, and long, chromed mufflers. Thoroughly modern performance courtesy of the cc V-twin engine, specially tuned for low-revving torque. And maintenance-reducing features like shaft final drive. Best of all, the Aero is a huge bargain, giving you a big-bike ride without the big-bike price. And it's a bargain when it comes time to fill up, too. If you're ready to turn some heads in a big way, and appreciate a bike that's never going to go out of style, the Aero is the machine for you. Performance-cruising, value, style and a look all its own: There's no doubt that the newest member of our VTX family, the standard cc VTX, is sure to be a huge hit. The engine's a proven performer. The ride is pure VTX cool and comfort. And when it comes to style, you can see that for yourself. Is there any other form of motorsport as graceful as trials riding? It may look easy, but in reality you need a ton of talent. A key feature is the four-stroke cc Honda engine, and refined suspension components. Model CME. As you can see in the photos it is also missing some part
